

Elastomer – Latest technologies for elastomer injection molding

We are happy to invite you to our **SIGMA technical talk Elastomer** on February 18th. This web-seminar will inform you about the state-of-the-art in elastomer injection molding!

With exclusive web presentations from **LWB Steinl**, **Peta Formenbau**, **Plasmatreat** and **SIGMA Engineering** you will stay on top of the latest developments and keep up with the recent trend.

Our technical director Timo Gebauer will guide you through our two-hour program and our elastomer expert Manuel Schmellenkamp will inform you about developments in virtual molding for the elastomer industry.

We make 2021 your year and support you with presentations from:

Thursday, 18. February 2021

From 2:55 pm Meeting Login

- 3 pm New trends and production concepts for elastomer process |
LWB Steinl, Markus Zabel, Head of process engineering and process
development
- Advantages of simulation for elastomer processes |
SIGMA Engineering, Manuel Schmellenkamp, Technical Sales Manager
- Benefits when using cold runner systems |
Peta Formenbau, Alexander Wolf, Managing Director
- Openair-Plasma[®] technology for pretreatment of elastomer components |
Plasmatreat, Joachim Schüßler, Head of Sales Germany

Organizational details:

As soon as you have registered for the web seminar, we will send you a confirmation e-mail and your access link. In addition, you will receive a reminder e-mail one day and one hour before the event, so that absolutely nothing gets lost! We look forward to your active participation and questions after the presentations.

Not yet registered? Register now via [our event calendar](#).
